

April 2013, Amsterdam

Letter of Recommendation - Galina Malareva

To whom it may concern,

Galina Malareva worked in the Art Department of Quadriga Art International in Amsterdam from November 2011 to May 2013. Galina provided excellent support to myself as Creative Art Manager in implementing key design and communications projects and in providing a visual design service to the various sales representatives of the international market. She very quickly gained a good understanding of the direct marketing industry and was always ready to take on any task we assigned to her.

Galina's computing and technology skills are excellent and she is one of the most talented graphic designers and creative persons I know. Galina worked on many design projects and many innovative and creative concepts that have been very valuable to our business. Galina has a positive can do approach and invests time and effort in getting the job done. I found her work to be of very high quality, she was very reliable and conscientious in performing her duties in conjunction and a very important member of the creative team.

In addition to her core responsibilities she also worked through her own initiative on new project areas such as 3D-pop up cards, greeting cards and other printed paper items and advised on many new mailing items for Quadriga Art International. Based on her strong design background Galina also contributed considerably to the resources of our Creative Services Department updating our product catalogue.

I would not hesitate to recommend Galina to any potential employers. I thank Galina for her contributions to Quadriga Art International and I am confident she will be an asset to any future company or creative team.

Yours sincerely,
Sonja Geyer
Creative Art Manager
